

Transform Compliance into Efficiency with Smile CMS Suite

Meeting CMS regulations is a fundamental requirement for Medicaid and Medicare payers, but achieving mere compliance isn't enough to transform your business. To truly excel, payers must streamline operations, integrate disparate systems, and unlock valuable insights from their data.

The Smile CMS Suite empowers payers to transcend basic compliance. By facilitating integration with existing systems, it enhances data flow and management, while providing the tools to unlock new insights from semantically structured healthcare data.

How We Can Help

Smile Digital Health offers a comprehensive and scalable solution with the CMS Suite, designed to propel your data modernization efforts. Move beyond compliance to reap the benefits of a consolidated FHIR repository with computable data and the Smile Clinical Reasoning engine.

Smile CMS Suite Features

e-PriorAuth API workflows compliant with HL7 Da Vinci standards

- **Coverage Requirements Discovery (CRD):** Ensures that providers are aware of the coverage requirements at the point of care, reducing delays and enhancing patient satisfaction.
- **Document Template Rules (DTR):** Supports the delivery of the correct templates to streamline documentation with support for pre-population to reduce the burden of data collection.
- **Prior Authorization Support (PAS):** Facilitates the prior authorization process, reducing administrative burdens and delays, thereby improving efficiency and speed of care delivery.

- It supports the provision of **denial reasons** as required by regulation, ensuring compliance and transparency in the authorization process.
- **Advanced request routing engine** to support flexible rules based integration with any number of internal systems or external delegates and third party processors.
- Take advantage of our industry-leading **Clinical Reasoning Engine** by authoring your medical policies into the CQL open standards computable data format to go beyond the mandates and fully automate your prior authorization process.

Payer-2-Payer API

- Provides all functionality to both make and respond to bulk data requests
- Support for Da Vinci Profiles and data filtering requirements
- Advanced FHIR consent service

Patient Access API

- Proven successful Patient Access API
- Support for new enhanced EOB resources and in process PriorAuth data
- Advanced FHIR consent service

Provider Access API

- CDS Service for responding to provider requests
- Native Member Attribution Support and Consent service
- Advanced FHIR consent service

Provider Directory API

- Native support for Provider Directory requirements with the Smile Health Data Platform

Common Features Across All APIs

All APIs include mandate compliant auditing and reporting features as well as a system administration UI for transaction troubleshooting.

Transform Compliance into Efficiency with Smile CMS Suite

Key Benefits of the CMS Suite

Operational Efficiency

Streamline operations with a central FHIR repository to serve all API information requests. The CMS Suite helps in automating repetitive tasks, allowing staff to focus on more critical activities.

Provider Productivity

By reducing administrative burdens and improving data accessibility, Payers can enhance provider relations and support the growth of their network. This enables providers to focus more on patient care, leading to better patient engagement and satisfaction.

Enhanced Decision-Making

Advanced analytics provide deeper insights, enabling better strategic decisions. By leveraging consolidated data, payers can identify trends and make data-driven decisions that improve patient outcomes and operational efficiency.

Comprehensive Compliance

Full compliance with CMS 0057F regulations ensures that your organization stays ahead of regulatory requirements, avoiding penalties and maintaining good standing with CMS.

REAL-WORLD IMPACT

COST SAVINGS

The implementation of the Smile CMS Suite with Auto Adjudication can save Payers up to \$3.30/member in operational costs alone.*

EFFICIENCY GAINS

By implementing the Smile CMS Suite, both Payers and clinical practices can reduce their prior authorization administrative burden by up to 70%**.

Auto adjudication of Prior Auth requests can deliver approvals in real time at the point of care.

By streamlining operations and reducing manual interventions, Smile CMS Suite helps you enhance operational efficiency, improve data integration, and make informed decisions with advanced analytics.
